

Geraniums

Impatiens

Philodendron

Egg Carton Garden

Plants that propagate from stem cuttings

Challenge

Grow new plants with cuttings from your house plants or outdoor garden

Constraints

Needs to remain moist, but not too wet

Needs to remain in the sun for warmth

Search, Cut & Plant

Fill the mostly whole egg shells with pebbles for drainage

Fill the egg shells with loose potting soil

Clip the cutting and remove the lower leaves

Place in the egg shell, pat down softly, cover in serene

Taking it further

Try rooting your stem cuttings in water for 2 weeks

Try putting seeds in a zip lock bag to germinate
